

Social Contribution Policy

JTB Communication Design, Inc. (“JCD”) will, as a corporate citizen, collaborate and coordinate with local communities to actively engage in social contribution through creating communication.

Our activities will focus on nurturing the next generation and realizing an inclusive society, thereby contributing to the further development of local communities and to a society filled with diverse values and individuality.

Focus areas

1. Nurturing the next generation

Developing the youth who will support the future social foundation is a society-wide responsibility.

JCD will, through its operations, strive to provide learning opportunities for the youth to develop the ability to engage with society and unlock their potential.

2. Realizing an inclusive society

For people with diverse backgrounds and values to co-exist, there exist many communication challenges.

JCD will address such challenges through its operations, aiming to realize a society in which all people can play active roles.
